

For Immediate Release: 01/12/10

SUNSLATES™ receive official approval from the Department of Community Affairs, Florida Building Codes!

Sacramento California - January 12, 2010 - Atlantis Energy Systems, Inc. in conjunction with Florida's own C5K Energy, has just been notified of the official approval from the Department of Community Affairs, Florida Building Codes, for SUNSLATES™, Atlantis Energy's premier slanted roof solar electric roofing tile product! Now available in Florida through C5K, for both residential and commercial application!

SUNSLATES™ make up an advanced photovoltaic system that turns the homeowners' roof into a power plant, and is safety rated to keep the home safe from blackouts, wind, water, and fire. The natural design of the SUNSLATES™ gives the roof a clean and powerful look. Built on the great appearance and durability of the traditional slate roof, SUNSLATES™ provides the best combination of the traditional and modern roofing solutions.

Atlantis Energy Systems is recognized as the leading innovator in solar PV, with over 600 successful installs and the winner of many awards, and through its partnership with NYSERDA, New York State Energy Research and Development Authority, continues to build a sustainable products manufacturing presence in New York State. Atlantis offers a full range of state-of-the-art sloped roof solar photovoltaic roofing tile solutions, featuring the prestigious SUNSLATES™ product line, along with custom architectural BIPV glass laminates, and custom PV design esthetic products. SUNSLATES™ bring both beauty *and* power production to building design. To see for yourself, visit the Atlantis Photo Gallery.

C5K Energy C/O Aviation Export Intl, Inc. 1100 Lee Wagener Blvd., Ste 115D Fort Lauderdale, FL 33315 is the Exclusive Product Distributor and Contractor Training Coordinator for the SUNSLATES™ products in Florida and the English speaking Caribbean. Call Richard at 800-640-9191 or visit the C5K website at C5K.com

Or call Joe at the Sacramento Atlantis sales office, 916.438.2930, and Sean at the Orange County Atlantis sales office, 858.433.9743.

Atlantis Energy Systems, Inc., a privately-held Delaware corporation, is a leading manufacturer of Building Integrated Photovoltaic (BIPV) products. Atlantis offers a family of BIPV product solutions for residential and high-end homeowners, commercial real estate developers, governments and institutions. Using a proprietary, state of the industry glazing technology, Atlantis laminates PV cells into glass for use in BIPV applications covering the full spectrum of commercial and residential roofs, skylights, facades, atriums, sunshades and canopies. Atlantis' two primary products – SUNSLATES™ PV roofing system and custom architectural PV glazing systems – are the cornerstones of a family of BIPV products including the A-100 solar electric Skylight, the MegaSlate PV Roof system and the BIG FOOT for large flat roof and landfill applications. AES services include design support/integration, on-site project coordination, training and warranty service.
